

## Blandy's Covid-19 Rules and Precautions for Volunteers

8/4/2020 | modified 2/1/21

- Volunteers should keep a six-foot distance from each other and all visitors.
- Face masks must be worn if volunteers are likely to come within six feet of another person. Everyone must bring his or her own face masks.
- Tools will be sanitized before the workday begins. Volunteers should not share tools.
- Only one person may ride in the Gator at a time. Steering wheel, shifter, and brake lever need to be wiped down between drivers. Antiseptic wipes will be provided in the Gator.
- If volunteers are asked to work in areas where visitors are likely to come within six feet of them, the work area will be blocked off by signs and/or cones telling visitors the area is temporarily closed.
- Everyone must bring his or her own water. Water cannot be refilled at the Blandy Quarters fountain, though outdoor taps are potable.
- All volunteers should enter their hours online. (Email Sue Ridley at [sue.ridley@virginia.edu](mailto:sue.ridley@virginia.edu) for details.)
- Volunteers must perform a personal health check prior to each volunteer shift. (See "Volunteer Personal Health Check" below.)
- If a volunteer tests positive for COVID-19, her or she may not work any volunteer shifts for at least the next 14 days.

Before your first shift, please email Sue Ridley at [sue.ridley@virginia.edu](mailto:sue.ridley@virginia.edu) and state that you agree to abide by the guidelines listed above.

### Volunteer Personal Health Check

Before reporting to any volunteer shift, please ask yourself the following questions:

- 1) Do I have any symptoms of COVID19, such as
  - Fever?
  - Cough?
  - Shortness of breath?
  - Chills?
  - Sore throat?
  - Muscle aches?
  - Loss of taste or smell?
  - New diarrhea?

- 2) Have I been exposed to anyone with a suspected or confirmed case of COVID-19 in the past 14 days?
- 3) Have I traveled internationally or to areas with high rates of COVID-19 infection in the past 14 days?

If you answered “yes” to any of these questions and your symptoms are not otherwise explained by a chronic medical issue, please stay at home and seek medical advice.

Thank you!
